

PS -- How To Install & Load Actions

All Photoshop actions have a .atn file ending.

You can double click on an action on your computer and it will open in Photoshop.

You can also open the Actions panel in Photoshop, click on the icon in the upper right corner to get a flyout menu, and choose Load Action. Navigate to the action and double click on it to load it.

- The action will appear as a folder with one or more actions below it.
- Each action has a triangle next to it. Click on the triangle if you want to see the individual steps of the action.

How to use actions

- Click on the action you want to use.
- Click on the triangular Play button at the bottom of the Actions panel to run the action.
- The action may stop and give you the opportunity to adjust a dialog box. Make any desired adjustments and click OK to continue with the action.
- The action may stop and give you directions to do something. Do what it says and then click the play button to continue with the action.
