

PSE -- How To Install & Load Layer Styles

Photoshop Elements 15 and later (Mac or Windows):

- Make sure you are in Expert Mode.
- Open the Styles panel (Window > Styles).
- In the upper right corner, click on the icon to open a fly out menu.
- Choose Load Styles.
- Navigate to the folder with the .asl layer style you want to load and double click on it.
- The style will appear on the panel.
- The style will also be listed in the menu of styles at the top of the Styles panel for access at any time until you delete them.

Photoshop Elements 11 through 14 (Mac or Windows):

- Make sure you are in Expert Mode.
- Open the Effects panel (Window > Effects).
- At the top of the panel, click on Styles
- In the upper right corner, click on the icon to open a flyout menu.
- Choose Load Styles.
- Navigate to the folder with the .asl layer style you want to load and double click on it.
- The style will appear on the panel.
- The style will also be listed in the menu of styles at the top of the Styles panel for access at any time until you delete them.
