Learn how to use the Camera Raw Filter to easily edit the Color Balance of any photo.

Prepare the Workspace

- Open the photo (File > Open) that needs to be edited before using it on a scrapbook page.

Edit the Color Balance

- In the Menu Bar, choose Filter > Camera Raw Filter.
- In the Right Side Menu, click on the word Color to toggle it open.
- Click and drag the Temperature slider to adjust the Color Balance. Move it left to cool the image and move it right to warm the image.
- Click OK to close the filter dialog box.
